RESEARCH AND PUBLICATIONS

Note about conference papers: In Human-Computer Interaction, conference proceedings are the preferred publication venue since they are timelier and typically have the greatest impact. Top-tier conferences are very selective with rigorous multi-stage reviews of full manuscripts creating high-quality, fully archival, proceedings.

Note about venues: CHI (ACM Conference on Human Factors in Computing Systems) and UIST (the ACM symposium on User Interface Software and Technology) are both recognized as top tier HCI conferences (Google Scholar ranks them as #1 and #3). The average acceptance rate for CHI is 23% and UIST is 21%.
